Greg is a registered patent attorney dedicated to safeguarding the intellectual property of inventors. With a career spanning over two decades, Greg has been instrumental in guiding clients through the intricate landscape of patent law since 2001. His expertise encompasses a wide array of technologies, ranging from computer systems and software to bioinformatics, lidar systems, optics, and beyond.

Notably, Greg has played a pivotal role in shaping patent strategies, preparation, and prosecution across diverse industries, including machine learning, artificial intelligence, signal processing, communication networks, data storage, semiconductors, integrated circuits, production printing, aerospace systems, and directed energy weapon systems. His insights and unwavering dedication have earned him the trust of countless innovators seeking to protect their groundbreaking ideas.

Greg's accomplishments extend beyond mere legal counsel. He has a track record of securing patents that have made significant impacts, such as his work in pioneering targeted advertising within the cable television industry. This groundbreaking effort culminated in his client receiving the prestigious Emmy Award for Technology in 2021, a testament to Greg's ability to translate visionary concepts into tangible success stories.

With a portfolio boasting hundreds of domestic and foreign patent applications, Greg's prowess in patent prosecution is unmatched. He navigates complex legal challenges with finesse, offering valuable insights

into Patent and Trademark Office appeals, Inter Partes reviews, non-infringement opinions, patentability opinions, freedom-to-operate opinions, and trademarks. Greg's multifaceted approach ensures comprehensive protection for his clients' intellectual assets, safeguarding their innovations in an ever-evolving marketplace.

Before embarking on his legal career, Greg honed his skills as an electrical engineer at renowned companies such as Motorola and General Dynamics, specializing in the defense sector. His tenure in the U.S. Air Force further solidified his commitment to excellence and service, instilling in him the values of integrity, discipline, and innovation that continue to define his professional journey.

In every endeavor, Greg remains steadfast in his mission to empower inventors and innovators, offering unwavering support and unparalleled expertise to navigate the complexities of intellectual property law. As a trusted advocate and seasoned strategist, Greg stands at the forefront of intellectual property protection, shaping the future of innovation one patent at a time.
